This monthly summary report (MSR) summarizes environmental restoration activities conducted on behalf of The Regents of the University of California (UC) at Richmond Field Station since January 15, 2007. This MSR is prepared in accordance with the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC) Site Investigation and Remediation Order, Docket No. I/SE-RAO 06/07-004, effective on September 20, 2006. The MSR is presented in two sections. Section 1.0, Activities Completed During Reporting Period, describes work conducted during the reporting period, and Section 2.0, Activities Anticipated for Next Reporting Period, identifies activities proposed for the next 30 days.

1.0 ACTIVITIES COMPLETED DURING REPORTING PERIOD (SINCE JANUARY 15, 2007)

- Time Critical Removal Action at the Former Forest Products Laboratory Wood Treatment Laboratory (TCRA). The following activities were completed:
  - UC completed backfilling the excavation with DTSC-approved Math Sciences Research Institute (MSRI) stockpile soil.
- UC completed sediment and surface water monitoring required by the *Groundwater, Surface Water and Sediment Monitoring Plan*.
- UC collected shallow soil samples for analysis from the Transition Area and the remediated Stege Marsh to assure the protection of workers completing weeding and other restoration activities.
- UC implemented feral animal trapping as required by the Feral Animal Management Program.

2.0 ACTIVITIES ANTICIPATED DURING NEXT REPORTING PERIOD (NEXT 30 DAYS)

- UC will issue the TCRA Implementation Report to DTSC.
- UC will continue to implement invasive plant control as required by the Invasive/Exotic Vegetation Management Program.
