CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD SAN FRANCISCO BAY REGION

TENTATIVE ORDER

RESCISSION OF ORDER NO. 01-101 SITE CLEANUP REQUIREMENTS FOR:

ZENECA INC. 1415 SOUTH 47th STREET RICHMOND, CONTRA COSTA COUNTY

MEADE STREET OPERABLE UNIT SUBUNIT 1

The California Regional Water Quality Control Board, San Francisco Bay Region, (hereinafter called the Board), finds that:

- <u>Site location</u>: The Zeneca Inc. (Zeneca) site is located at 1200 and 1415 South 47th Street in Richmond, south of Interstate 580, and along the San Francisco Bay shoreline in Richmond, California (refer to Figure 1). The Zeneca site and portions of the adjacent University of California Richmond Field Station (UCRFS) site comprise the area designated as the Meade Street Operable Unit, Subunit 1 (refer to Figure 2).
- 2. <u>Site owner</u>: The Zeneca site was formerly owned by the Stauffer Chemical Company (Stauffer), which utilized the site to manufacture industrial and agricultural chemicals. Sulfuric acid was manufactured from approximately 1897 to 1970. Stauffer acquired all of the parcels on which these companies operated by 1949. After 1985, Stauffer was acquired and divested by a number of companies, the last being, Zeneca's predecessor company, ICI Americas, which acquired the site in 1987. Zeneca is liable for releases originating at the site by it or its predecessors in interest and is hereinafter named as the discharger.
- 3. <u>Purpose of this Order</u>: The purpose of this Order is to rescind Site Cleanup Requirements (SCRs) Order No. 01-101 due to a change in lead agency oversight from the Board to the Department of Toxics Substances Control (DTSC).

- 4. <u>Basis for lead agency change</u>: The Board adopted Site Cleanup Requirements Order No. 01-101 for Subunit 1 in September 2001. The Board's Order required cleanup of the upland areas of the site to standards appropriate for commercial reuse and cleanup and restoration of the adjacent wetlands. In the fall of 2003 Subunit 1 was sold to Cherokee Simeon Ventures (Simeon), and shortly after, Simeon announced its intent to revise the future land use from commercial to residential. The change in the intended land use resulted in considerable public opposition and scrutiny for both Subunits 1 and 2. In order to address public concerns, Cal/EPA, in late 2004 and early 2005, directed a lead agency change from the Board to DTSC. In March 2005, DTSC issued a Work Order for the site. Due to this change in lead agency oversight, it is appropriate that the Board rescind Order No. 01-101.
- 5. <u>Current Status of Site</u>: The discharger has completed a significant portion of the remedial action tasks required under the Board's SCRs, including site investigation, removal of contaminant sources, and implementation of extensive remedial measures in upland and wetland areas. The discharger also recorded two deed restrictions (per Task 8.b of Board Order No. 01-101) which limited the site to non-residential use. Modification of the deed restrictions, and additional site monitoring, investigation, and cleanup, will be implemented under the oversight of DTSC.
- 6. <u>California Environmental Quality Act</u>: This action is an Order to enforce the laws and regulations administered by the Board. This action is categorically exempt from the provisions of the California Environmental Quality Act pursuant to Section 15301, Title 14, California Code of Regulations.
- 7. <u>Notice and Meeting</u>: The Board has notified the Discharger and interested agencies and persons of its intent to rescind Site Cleanup Requirements, and has provided them with an opportunity for a public hearing and an opportunity to submit their written views and recommendations.
- 8. <u>Public Hearing</u>: The Board, in a public meeting, heard and considered all comments pertaining to the discharge.

IT IS HEREBY ORDERED that the Site Cleanup Requirements Order No. 01-101 is rescinded.

I, Bruce H. Wolfe, Executive Officer, do hereby certify that the foregoing is a full, complete, and correct copy of an Order adopted by the California Regional Water Quality Control Board, San Francisco Bay Region, on _____.

Bruce H. Wolfe Executive Officer
