

**UNIVERSITY OF CALIFORNIA, BERKELEY
RICHMOND FIELD STATION
MONTHLY SUMMARY REPORT**

MARCH 15, 2010

This monthly summary report (MSR) summarizes environmental site investigation and remediation activities conducted on behalf of The Regents of the University of California (UC) at the University of California, Berkeley's Richmond Field Station in accordance with Section 6.3 of the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC) Site Investigation and Remediation Order (Order), Docket No. I/SE-RAO 06/07-004, effective on September 20, 2006.

a. Specific actions taken by or on behalf of Respondents during the previous calendar month (February 2010).

- Implementation of invasive plant control continued as required by the *Invasive/Exotic Vegetation Management Program*.
- Clapper rail surveying for the *Year 5 Monitoring Report for the Western Stege Marsh Restoration Project* commenced in January continued.
- A near-surface sediment sample was collected on February 18, 2010 from Western Stege Marsh as part of the continuing monitoring for worker protection and evaluation of current near-surface-sediment conditions consistent with the March 2008 Agency for Toxic Substances and Disease Registry Public Health Assessment and California Department of Public Health findings and recommendations.
- A portion of the land surveying of marsh elevations for the *Year 5 Monitoring Report for the Western Stege Marsh Restoration Project* was performed on February 22, 2010.

b. Actions expected to be undertaken during the current calendar month (March 2010).

- Implementation of invasive plant control will continue as required by the *Invasive/Exotic Vegetation Management Program*.
- On March 9, 2010, UC Berkeley staff met with DTSC staff to discuss final revisions to the Field Sampling Workplan (FSW). It is anticipated that UC Berkeley will submit the final FSW to DTSC in late March or early April.
- Feral animal trapping will be completed as required by the *Feral Animal Management Program* (including dates rescheduled from January and February).

- Clapper rail surveying for the *Year 5 Monitoring Report for the Western Stege Marsh Restoration Project* will continue.
 - The remaining portions of the land surveying of marsh elevations for the *Year 5 Monitoring Report for the Western Stege Marsh Restoration Project* were completed on March 15, 2010.
- c. All planned activities for the next month (April 2010).
- Implementation of invasive plant control will continue as required by the *Invasive/Exotic Vegetation Management Program*.
- d. Any requirements under the Order that were not completed.
- Feral animal trapping was not completed in February because scheduling was not possible. Trapping that was to be completed will be rescheduled for the upcoming months.
- e. Any problems or anticipated problems in complying with this Order.
- Completion of the Field Sampling Workplan and other tasks is dependent on the ability to meet with DTSC staff on a timely basis and may require adjusting schedules and extensions of deadlines.
