Mr. Greg Haet
EH&S Associate Director, Environmental Protection
317 University Hall, No 1150
Berkeley, California 94720

Dear Mr. Haet:

The Department of Toxic Substances Control (DTSC) received the *Final Phase I October 2011 Groundwater Sampling Results Technical Memorandum* (Technical Memorandum), for the University of California, Berkeley, Richmond Field Station located in Richmond, California. The Technical Memorandum, dated February 29, 2012, was prepared by Tetra Tech EM Inc. on behalf of the University of California. Ground water samples and water level measurements were collected in October 2011 from 50 shallow zone piezometers and represent the third round of ground water samples collected at the site. Ground water levels were also measured in four deeper zone piezometers. The purpose of the monitoring is to evaluate seasonal fluctuations in chemical concentrations and ground water elevations. DTSC has reviewed the revisions made to the document and has no further comments; therefore, the Technical Memorandum is approved.

If you have any questions regarding this letter, please contact Lynn Nakashima at (510) 540-3839 or email at lnakash@dtsc.ca.gov.

Sincerely,

Lynn Nakashima, Project Manager
