

**UNIVERSITY OF CALIFORNIA, BERKELEY**  
**RICHMOND FIELD STATION**  
**MONTHLY SUMMARY REPORT**

**MARCH 15, 2012**

This monthly summary report (MSR) summarizes environmental site investigation and remediation activities conducted on behalf of The Regents of the University of California (UC) at the University of California, Berkeley's Richmond Field Station in accordance with Section 6.3 of the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC) Site Investigation and Remediation Order (Order), Docket No. I/SE-RAO 06/07-004, effective on September 20, 2006.

a. Specific actions taken by or on behalf of Respondents during the previous calendar month (February 2012).

- On February 1, 2012, UC Berkeley responded to the January 11, 2012 comments letter from DTSC regarding the Final Phase I, April 2011 Groundwater Sampling Results Technical Memorandum, dated December 9, 2011.
- On February 3, 2012, a near surface sediment sample was collected from the Western Stege Marsh as part of continued monitoring for worker protection and evaluation of current near surface sediment conditions consistent with the March 2008 Agency for Toxic Substances and Disease Registry Public Health Assessment and California Department of Public Health findings and recommendations.
- On February 29, 2012, UC Berkeley responded to the February 7, 2012 DTSC comment letter on the January 10, 2012 Field Sampling Phase 1, October 2011 Groundwater Sampling Results report and submitted the Final Phase 1 October 2011 Groundwater Sampling Results Technical Report.

b. Actions expected to be undertaken during the current calendar month (March 2012).

- On March 6, 2012 UC Berkeley submitted the Wetland Determination, Western Stege Marsh report to USACE, DTSC, and the U.S. Fish and Wildlife Service. The report was completed as requested by USACE at the October 13, 2011 agencies meeting. A jurisdictional wetlands delineation at the restored marsh area was conducted on November 21, 2011 to verify completion of conditions of USACE Clean Water Act, Section 404, Nationwide Permit (NWP) 38 #28135S issued for the 2002-2004 remediation and restoration activities in Western Stege Marsh.
- UC Berkeley anticipates submitting a draft Phase III Field Sampling Workplan to continue to assess soil in portions of previously identified data gap areas of the RFS by the end of March 2012.

c. All planned activities for the next month (April 2012).

- UC Berkeley will perform the fourth round of groundwater elevation measurements and water quality sampling of RFS piezometers, including those installed in 2010. Sampling will be completed according to the Proposed Continued Groundwater Monitoring October 2011 workplan with adjustments to include field filtering for metals analyses as described in February 29, 2012 Final Phase 1 October 2011 Groundwater Sampling Results Technical Report

d. Any requirements under the Order that were not completed.

None.

e. Any problems or anticipated problems in complying with this Order.

- Completion of implementation of the Field Sampling Workplan and other tasks is dependent on the ability to meet with DTSC staff on a timely basis and may require adjusting schedules and extensions of deadlines.
