

**UNIVERSITY OF CALIFORNIA, BERKELEY**  
**RICHMOND FIELD STATION**  
**MONTHLY SUMMARY REPORT**  
**February 15, 2013**

This monthly summary report (MSR) summarizes environmental site investigation and remediation activities conducted on behalf of The Regents of the University of California (UC) at the University of California, Berkeley's Richmond Field Station in accordance with Section 6.3 of the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC) Site Investigation and Remediation Order (Order), Docket No. I/SE-RAO 06/07-004, effective on September 20, 2006.

- a. Specific actions taken by or on behalf of Respondents during the previous calendar month (January 2013).
- On January 10, 2013, UC Berkeley submitted the Draft Site Characterization Report (SCR), Proposed Richmond Bay Campus which includes the Field Sampling Plan Phase III results. UC Berkeley staff also met with DTSC to discuss the continued site assessment and remedial action approach for the RFS.
  - On January 10, 2013, UC Berkeley staff conducted its monthly meeting with DTSC to provide project updates and to coordinate anticipated activities.
  - On January 7, 2013 UC Berkeley submitted the Registered Engineer's stamped final Phase I November 2010 through April 2012 Groundwater Sampling Results Technical Report on December 13, 2012. The final report includes revisions requested by DTSC on the draft September 5, 2012 report. The final report presents the results of the semi-annual groundwater monitoring recently completed in April 2012 and summarizes the results of the four rounds of groundwater sampling completed between November 2010 and April 2012. Response to comments were submitted on November 13, 2012 and the final report was approved by DTSC on December 4, 2012 pending completion of minor revisions included in the final report. DTSC approved the final stamped report on January 15, 2013.
- b. Actions expected to be undertaken during the current calendar month (February 2013).
- On February 4, 2013, a near surface sediment sample was collected from the Western Stege Marsh as part of continued monitoring for worker protection and evaluation of current near surface sediment conditions consistent with the March 2008 Agency for Toxic Substances and Disease Registry Public Health Assessment and California Department of Public Health findings and recommendations.
  - On February 14, 2013, UC Berkeley staff conducted its monthly meeting with DTSC to provide project updates and to coordinate anticipated activities.

c. All planned activities for the next month (March 2013).

- UC Berkeley anticipates submitting a Final SCR upon DTSC's concurrence with responses to DTSC comments on the draft report submitted January 10, 2013.
- UC Berkeley anticipates submitting a Draft Removal Action Workplan (RAW) for the Research, Education, and Support areas of the proposed Richmond Bay Campus by the end of March 2013. The RAW will evaluate final remedial actions in areas identified in the Final SCR that are recommended for removal actions or further monitoring of soil and/or groundwater.
- UC Berkeley staff will conduct its monthly meeting with DTSC on March 14, 2013 to provide project updates and to coordinate anticipated activities.

d. Any requirements under the Order that were not completed.

None.

e. Any problems or anticipated problems in complying with this Order.

- Completion of the Final SCR, continued efforts under the Field Sampling Workplan, and other tasks is dependent on the ability to meet with DTSC staff on a timely basis and may require adjusting schedules and extensions of deadlines.
