

UNIVERSITY OF CALIFORNIA, BERKELEY
BERKELEY GLOBAL CAMPUS AT RICHMOND BAY
RICHMOND FIELD STATION SITE
MONTHLY SUMMARY REPORT
November 15, 2016

This monthly summary report (MSR) summarizes environmental site investigation and remediation activities conducted on behalf of The Regents of the University of California (UC) at the University of California, Berkeley's Richmond Field Station Site in accordance with Section 6.3 of the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC) Site Investigation and Remediation Order (Order), Docket No. I/SE-RAO 06/07-004, effective on September 20, 2006.

a. Specific actions taken by or on behalf of Respondents during the previous calendar month (October 2016).

- Annual dry season groundwater elevations were collected during the first week of October 2016 in coordination with environmental consultants monitoring wells at the neighboring Campus Bay site.
- On October 13, 2016, 2016, UC Berkeley staff conducted its monthly meeting with DTSC to provide project updates and to coordinate anticipated activities.
- On October 25, 2016 a draft three year calendar for RFS DTSC Order activities was submitted to DTSC.

b. Actions expected to be undertaken during the current calendar month (November 2016).

- On November 3, 2016 a redline version of the Final Field Sampling Plan Phase V (FSP V) with corrections as presented in the October 13, 2016 Response to Comments was submitted to DTSC. The FSP V is based on previous investigations and agency discussions, as follows. A geophysical survey of the Western Transition Area was completed by a utility contractor in September 2015 to provide additional data on subsurface conditions that has provided assistance in determining where to collect soil samples. In November 2015 DTSC completed review of historic sampling documents and provided recommendations for locations to collect pore-water and sediment samples in Western Stege Marsh. On April 14, 2016 UC and DTSC met US EPA Region 9 staff via telephone to request input on additional sampling for polychlorinated biphenyls. UC submitted a first draft of the sampling plan on July 18, 2016 to which DTSC responded on September 12, 2016. Draft Response to Comments on this DTSC review was submitted to DTSC on October 13, 2016. Implementation of FSP V will begin in December 2016 pending approval of the final sampling plan redline version.
- On November 18, 2016 UC Berkeley staff will conduct its monthly meeting with DTSC to provide project updates and to coordinate anticipated activities.

c. All planned activities for the next month (December 2016)

- The next monthly meeting with DTSC to provide project updates and to coordinate anticipated activities will be held December 15, 2016.

- It is anticipated that implementation of the porewater and sediment samples collection portion of FSP V will be conducted in December.
- It is anticipated that a Request for Proposals will be issued to obtain bids from hazardous materials contractors for completion of the work described in the June 26, 2015 Plans and Specifications for the Removal Action Workplan for the Corporation Yard and PCB Transformer locations. The document will be reviewed for any UC Berkeley specifications revisions and the new For- Bid document will be submitted to DTSC, if there are any changes.

d. Any requirements under the Order that were not completed.
None.

e. Any problems or anticipated problems in complying with this Order.

- Completion of the RAW removal actions, continued efforts under the Field Sampling Workplan, and other tasks is dependent on the ability to meet with DTSC staff on a timely basis and may require adjusting schedules and extensions of deadlines.
