

**RICHMOND FIELD STATION
MONTHLY SUMMARY REPORT**

JANUARY 15, 2008

This monthly summary report (MSR) summarizes environmental restoration activities conducted on behalf of The Regents of the University of California (UC) at Richmond Field Station since December 15, 2007. This MSR is prepared in accordance with the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC) Site Investigation and Remediation Order, Docket No. I/SE-RAO 06/07-004, effective on September 20, 2006. The MSR is presented in two sections. Section 1.0, Activities Completed During Reporting Period, describes work conducted during the reporting period, and Section 2.0, Activities Anticipated for Next Reporting Period, identifies activities proposed for the next 30 days.

**1.0 ACTIVITIES COMPLETED DURING REPORTING PERIOD
(SINCE DECEMBER 15, 2007)**

- Time Critical Removal Action at the Former Forest Products Laboratory Wood Treatment Laboratory (TCRA). The following activities were completed:
 - UC began backfilling the excavation with DTSC-approved Math Sciences Research Institute (MSRI) stockpile soil.
- UC submitted its response to comments from DTSC on the draft Current Conditions Report received on October 23, 2007.
- UC completed storm-water monitoring required by the *Groundwater, Surface Water and Sediment Monitoring Plan*.

**2.0 ACTIVITIES ANTICIPATED DURING NEXT REPORTING PERIOD
(NEXT 30 DAYS)**

- UC will complete the backfill of the TCRA site with soil from the MSRI stockpile, as approved by DTSC.
- UC will issue the TCRA Implementation Report to DTSC.
- UC will collect shallow soil samples for analysis from the Transition Area and the remediated Stege Marsh to assure the protection of workers completing weeding and other restoration activities.
- UC will implement feral animal trapping as required by the Feral Animal Management Program.

- UC will continue to implement invasive plant control as required by the Invasive/Exotic Vegetation Management Program.
