

# **RICHMOND FIELD STATION MONTHLY SUMMARY REPORT**

**APRIL 15, 2008**

This monthly summary report (MSR) summarizes environmental restoration activities conducted on behalf of The Regents of the University of California (UC) at Richmond Field Station since March 14, 2008. This MSR is prepared in accordance with the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC) Site Investigation and Remediation Order, Docket No. I/SE-RAO 06/07-004, effective on September 20, 2006. The MSR is presented in two sections. Section 1.0, Activities Completed During Reporting Period, describes work conducted during the reporting period, and Section 2.0, Activities Anticipated for Next Reporting Period, identifies activities proposed for the next 30 days.

## **1.0 ACTIVITIES COMPLETED DURING REPORTING PERIOD (SINCE MARCH 14, 2008)**

- UC began use of glyphosate herbicide to control invasive weeds in upland restoration plots as part of the Invasive/Exotic Vegetation Management Program after receiving approval from the DTSC.
- UC implemented feral animal trapping as required by the Feral Animal Management Program.

## **2.0 ACTIVITIES ANTICIPATED DURING NEXT REPORTING PERIOD (NEXT 30 DAYS)**

- UC will submit a Time Critical Removal Action workplan for removing ash and debris from two small campfire pits located in the Western Transition Area.
- UC is planning on completing excavation of soil at the end of April for installation of footings for one or more research wind turbines in the field east of Building 112. The soil from the excavation will be stored in covered bins and sampled for waste characterization.
- UC will issue the Year 3 Monitoring Report for the Western Stege Marsh Restoration Project.
- UC will continue to implement invasive plant control as required by the Invasive/Exotic Vegetation Management Program.
