

**UNIVERSITY OF CALIFORNIA, BERKELEY
RICHMOND FIELD STATION
MONTHLY SUMMARY REPORT**

JUNE 15, 2008

This monthly summary report (MSR) summarizes environmental site investigation and remediation activities conducted on behalf of The Regents of the University of California (UC) at the University of California, Berkeley's Richmond Field Station in accordance with Section 6.3 of the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC) Site Investigation and Remediation Order (Order), Docket No. I/SE-RAO 06/07-004, effective on September 20, 2006.

- a. Specific actions taken by or on behalf of Respondents during the previous calendar month (May 2008).
 - Implementation of invasive plant control continued as required by the Invasive/Exotic Vegetation Management Program.
 - A draft Time Critical Removal Action Memorandum for removing ash and debris from two small campfire pits located in the Western Transition Area will be submitted to DTSC on May 6, 2008.

- b. Actions expected to be undertaken during the current calendar month (June 2008).
 - Surface water and sediment monitoring as required by Section 5.1.4 of the Order was completed on June 9, 2008.
 - Implementation of invasive plant control will continue as required by the Invasive/Exotic Vegetation Management Program.
 - University staff will meet with DTSC staff to complete revisions of the draft Current Conditions Report based on DTSC's comments.

- c. All planned activities for the next month (July 2008).
 - University staff will meet with DTSC staff to complete revisions of the draft Current Conditions Report based on DTSC's comments.
 - Implementation of invasive plant control will continue as required by the Invasive/Exotic Vegetation Management Program.
 - The Year 3 Monitoring Report for the Western Stege Marsh Restoration Project will be submitted to DTSC.

- Feral animal trapping will occur as required by the Feral Animal Management Program.
- d. Any requirements under the Order that were not completed.

A spring stormwater sample was not collected according to the implementation schedule presented in the *Final Report, Groundwater, Surface Water, and Sediment Monitoring Plan* (Order Section 5.1.4) because there were no spring rain storms during the months of March through June 2008 (through June 13, 2008) of sufficient intensity to generate stormwater runoff. The climatological spring season of March through May 2008 was the driest of 114 years of record in the state of California.
