Mr. Greg Haet
EH&S Associate Director, Environmental Protection
Office of Environment, Health & Safety
University of California, Berkeley
University Hall, 3rd Floor, #1150
Berkeley, California 94720

Dear Mr. Haet:

The Department of Toxic Substances Control (DTSC) received the revised *2015 Groundwater Sampling Results Technical Memorandum* (Memorandum), dated October 19, 2015, for the Richmond Field Station Site (also known as the Berkeley Global Campus at Richmond Bay) located at 1301 South 46th Street, Richmond, California. The Memorandum was prepared by Tetra Tech, Inc. on behalf of the Regents of the University of California, and presents the results of annual groundwater monitoring and maintenance conducted during the October 2014 to June 2015 time period. Specifically, groundwater water level measurements were collected in October 2014 and April 2015, and groundwater sampling was conducted in April 2015.

In October 2014, depth to water measurements was collected from both shallow and deep piezometers. In April 2015, water levels were measured, and included four new piezometers installed near the biologically active permeable barrier. Groundwater samples were collected in April 2015. DTSC provided you with comments to the draft report in a letter dated September 25, 2015. Based on our review of the report and the response to comments we have determined that all of the necessary modifications to the report have been made, and the report is approved.

If you have any questions, please contact Lynn Nakashima at lynn.nakashima@dtsc.ca.gov or (510) 540-3839.
