Roseville, CA 95661

Dear Ms. Beatty:

The Department of Toxic Substances Control (DTSC) received the September 19, 2014 document titled; *Response to Department of Toxic Substances Control Comments Regarding the "Monitoring Well Installation Report and Initial Groundwater Sampling Results, Vicinity of the Biologically Active Permeable Barrier, University of California, Richmond Field Station"* (Response to Comments). The Response to Comments was prepared by Terraphase Engineering Inc. on behalf of Zeneca, Inc. and provides responses to DTSC's August 04, 2014 comments regarding the subject investigation. The investigation was conducted by Terraphase Engineering for Zeneca on property owned by the University of California, Berkeley (UC) at the southeastern part of the UC Richmond Field Station which is adjacent to the Zeneca/former Stauffer property.

The wells in this area were put on a quarterly sampling schedule. After completing four quarters of sampling and analysis, Terraphase will prepare a technical memorandum including complete results and interpretation of the ground water investigations in the vicinity.

Based on our completed review of the Response to Comments, including the revised well installation and sampling report, the documents are approved.

If you have any questions, please contact Lynn Nakashima at (510) 540-3839 or lynn.nakashima@dtsc.ca.gov.

Sincerely,

Lynn Nakashima, Project Manager
