

DTSC WORK NOTICE

Department of Toxic Substances Control – Our mission is to protect the people, communities, and environment of California from harmful chemicals by cleaning up contaminated sites, enforcing hazardous waste laws, and compelling the development of safer products.

UC Richmond Field Station

1301 SOUTH 46TH STREET RICHMOND, CA 94804

Work is scheduled for October 19, 2020

Under the oversight of the Department of Toxic Substances Control (DTSC), the responsible party's (University of California, Berkeley) environmental consultants will be conducting environmental cleanup activities at the Site. The purpose of this action is to remove PCB contaminated soil in the EPA North Meadow. This meadow is located directly north of the EPA lab. This action will lead to the removal and disposal of approximately 2,000 cubic yards of soil to an appropriately permitted landfill.

What Work Will Be Done?

- Work is scheduled to begin October 19th and is expected to take 2-3 weeks.
- There will be an excavator on site to remove the soil, and it will be directly loaded into trucks for off-site disposal. If necessary, a water truck and hoses will be used to control dust from leaving the excavation boundaries.
- A job trailer, truck, forklift, and dozer support may also be present to support the removal action. The site will be fenced, and access to the EPA Lab will be maintained.
- The hazardous materials contractor will have approximately 5 people on site.
- 3-4 environmental consultants will be present for perimeter air monitoring and confirmation sampling.

Workers will be wearing protective gear and following Contra Costa County's COVID-19 social distancing requirements. All work will be completed during normal business hours (7:00 AM to 6:00 PM).
